# Disposable Hygiene in the Washroom

A well-equipped washroom is the key to effective and reliable hygiene. Beyond functionality, it must also deliver cost efficiency. **ZVG®** offers a perfectly coordinated range of products that meet the highest hygiene standards.

This makes them ideal not only for commercial washrooms, but also for use in the food processing industry, hospitals, and other healthcare facilities – wherever reliable hygiene products are essential.

## Paper Hygiene Products – Page 3 – 9

### zetForm® Disposable Folded Paper Towels

Available in a wide variety of sizes and colors, **ZVG®** disposable folded towels are offered in different plies and folds. They are suitable for universal use and perfectly compatible with **zetMatic®** folded towel dispensers.

### zetRoll® Disposable Hand Towel Rolls

The **ZVG®** range offers high-quality disposable hand towel rolls in various plies, sizes, and colors – with or without perforation. They are designed for universal use and are fully compatible with **zetMatic®** hand towel roll dispensers.

### zetGigant® Toilet Paper

The **ZVG®** range naturally includes a true classic among paper products: toilet paper. Available in numerous variations such as jumbo rolls and small rolls, and in 1-ply, 2-ply, or 3-ply.

### zetZubehör Waste Bags

Completing the **ZVG®** disposable range is a wide selection of waste bags and sacks – available in LDPE or HDPE, with or without drawstring. – available in LDPE or HDPE, with or without drawstring.

## Personal Care – Pages 10 – 15

### zetClean® Personal Care Products

The **ZVG®** range includes numerous specialised products for **skin protection**, **skin cleansing** and **skin care** for frequent use. The range also includes other liquid soaps and disinfectants.

## Dispenser Systems – Pages 16 – 26

### zetMatic® Washroom Dispensers

New in the **ZVG®** range: stainless steel dispensers for tampons and sanitary pads. They are becoming an essential part of modern washrooms. The corresponding consumables are available in several variations.

Within the **zetMatic®** program you will also find a wide range of proven and robust dispensers for consumables from **ZVG®** as well as other brands. The dispensers are made of plastic, sheet steel, or stainless steel and are divided into the series ECONOMY, BUSINESS, BASIC, COLOR, and STEEL. The products within each series are perfectly aligned with one another.

## Folded Paper Towels

### The perfect choice for dry hands

When it comes to practical hygiene, **ZVG®** products are a reliable choice. Whether in administrative offices, catering, workshops, educational or care facilities – **ZVG®** offers suitable and carefully coordinated hygiene products for all potential areas of application.

The skin-friendly **zetForm®** folded paper towels ensure quick and reliable hand drying. Their high absorbency, durable recycled quality, and soft texture create a comfortable washroom environment – with the added benefit of reduced consumption and lower costs.

All 2- and 3-ply  
folded towels have  
dot-to-dot embossing!

## Not all folds are the same

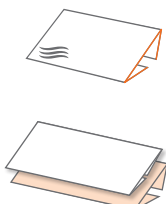

The washroom dispensers used across Europe are equipped with disposable paper towels in different fold types. To ensure compatibility, please specify the required fold when placing your order.

Can be used with or without a dispenser:

### C-fold

#### Layered folding

After one towel is removed, the next one must be pulled out and unfolded.

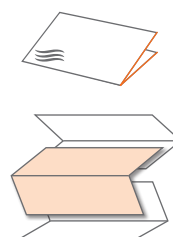

For use in dispenser only:

### V-fold / ZZ-fold

#### Zig-zag fold

After one towel is removed, the next one is ready to take – it must be unfolded after removal.

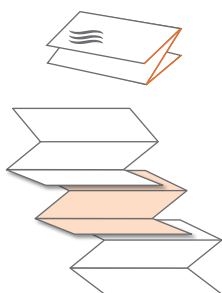

For use in dispenser only:

### Z-fold

#### Fully unfolded (interfold)

#### Non-Stop

After one towel is removed, the next one is ready to use; no unfolding required.

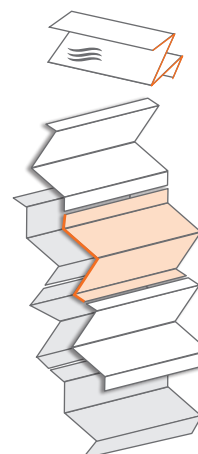

For use in dispenser only:

### W-fold / M-fold

#### Fully unfolded (Interfold)

#### One-Stop

After one towel is removed, the next one is immediately ready to use; no unfolding required.

## Laboratory and hygiene wipes

zetBox® laboratory and hygiene wipes are highly absorbent, low-lint and ultra-soft. In their practical dispenser box, they are ideal for washbasins in demanding hotels and restaurants as well as in industry and commerce.

## Hand Towel Rolls

### Maximum cleanliness – straight from the roll

The high-quality **zetRoll®** disposable towels are ideal for catering, schools, care facilities or kitchens and are indispensable at petrol stations for thorough removal of dirt, oil and fuel residues.

They are perfect for quick and practical hand drying as well as for fast, effective wiping of surfaces and objects in the surrounding area.

All 2- and 3-ply hand towel rolls have dot-to-dot embossing for extra absorbency and strength.

## Toilet paper

### Hygiene comes with its own rules

**ZVG®** offers a select range of voluminous, absorbent and strong toilet papers. The generous **zetGigant®** jumbo roll proves its true greatness, setting new economic standards: less frequent refilling, reduced maintenance and reliable operational readiness.

| Description                                                                                                     | Plies |  | L x W                      | Tear  | PU                  | PU/Pallet                | Art.             |

## Reliable waste disposal for every need

Wherever cleaning takes place, waste is inevitable.

Within the **ZVG®** range, you will find waste bags in a variety of designs and material strengths – perfectly suited for all types of cleaning tasks.

Available with drawstring, side seam, or extra-strong quality, either perforated or individually wound on rolls.

## Protect – Clean – Care

Anyone who frequently works with oils, paints, acids, or alkalis must take special care of their hands. The **zetClean®** 3-step system from **ZVG®** offers the perfect solution.

Only the combination of protection, cleaning, and care can reliably prevent long-term skin damage..

**Skin protection:**  
before and during work

**Skin cleansing:**  
during and after work

**Skin care:**  
after work

## Skin protection

From the very start of work and after every break, your hands should be protected.

When carefully applied, a protective cream forms an invisible barrier on the skin, helping to prevent irritations and contact eczema.

Even "ordinary" dirt is less likely to penetrate the skin, making it easier to clean your hands after work.

## Skin cleansing

In industry and crafts, workers come into contact with a wide variety of substances. The **zetClean®** range offers different hand cleaning creams and gels to effectively remove residues – whether cleaning agents, acids, alkalis, oils, fats, adhesives, or glues.

The products are applied thoroughly to well-moistened hands and massaged in – especially under the fingernails and around the nail bed – until the dirt is loosened. Then rinse thoroughly with water.

| Description                                                                                                                                                                                                                                                                  | Contents        | PU        | Palett     | Art.             |

## Skin care

After work, hands need to be cleaned – but that alone is not enough. Especially after thorough cleansing, it is essential to reactivate the skin's natural protective barrier.

A skin care cream restores the necessary moisture, protects against dryness and cracking, and supports regeneration.

Its nourishing effect is not only ideal for hands, but can also be applied to other parts of the body..

| Description                                                                                                                                                                                                      | Contents                                                                                                                                                                                                                                                     | PU        | Palett       | Art.             |

## Hand and Surface Disinfection

Pathogens can survive on surfaces for months. Through hands or dust, there is always a risk of transmission to humans.

With every touch of everyday objects such as door handles, light switches, or telephones, existing germs are not only transferred but also new ones are left behind.

Regular surface disinfection reduces the risk of spreading diseases and infections.

| Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                     | Contents                                                                                                                                                                                                                                                         | PU               | Art.        |           |                  |     |          |           |                  |     |          |         |                  |  |  |

## Tampon and Sanitary Pad Dispensers

### ... for reliable hygiene in schools and workplaces

For young individuals and adults alike, getting their period can often be a stressful and uncomfortable situation – especially when tampons or sanitary pads are not immediately available. Providing free access to menstrual products also helps to reduce period poverty and offers real relief.

In those moments, it is essential to provide support and quick solutions that help them feel safe and comfortable – whether in schools, universities, offices, or workplaces.

Our combined tampon and sanitary pad dispenser offer the ideal solution to meet individual hygiene needs. In the **ZVG®** range, you will find not only robust dispensers but also the right consumables and a dedicated hygiene unit for safe disposal.

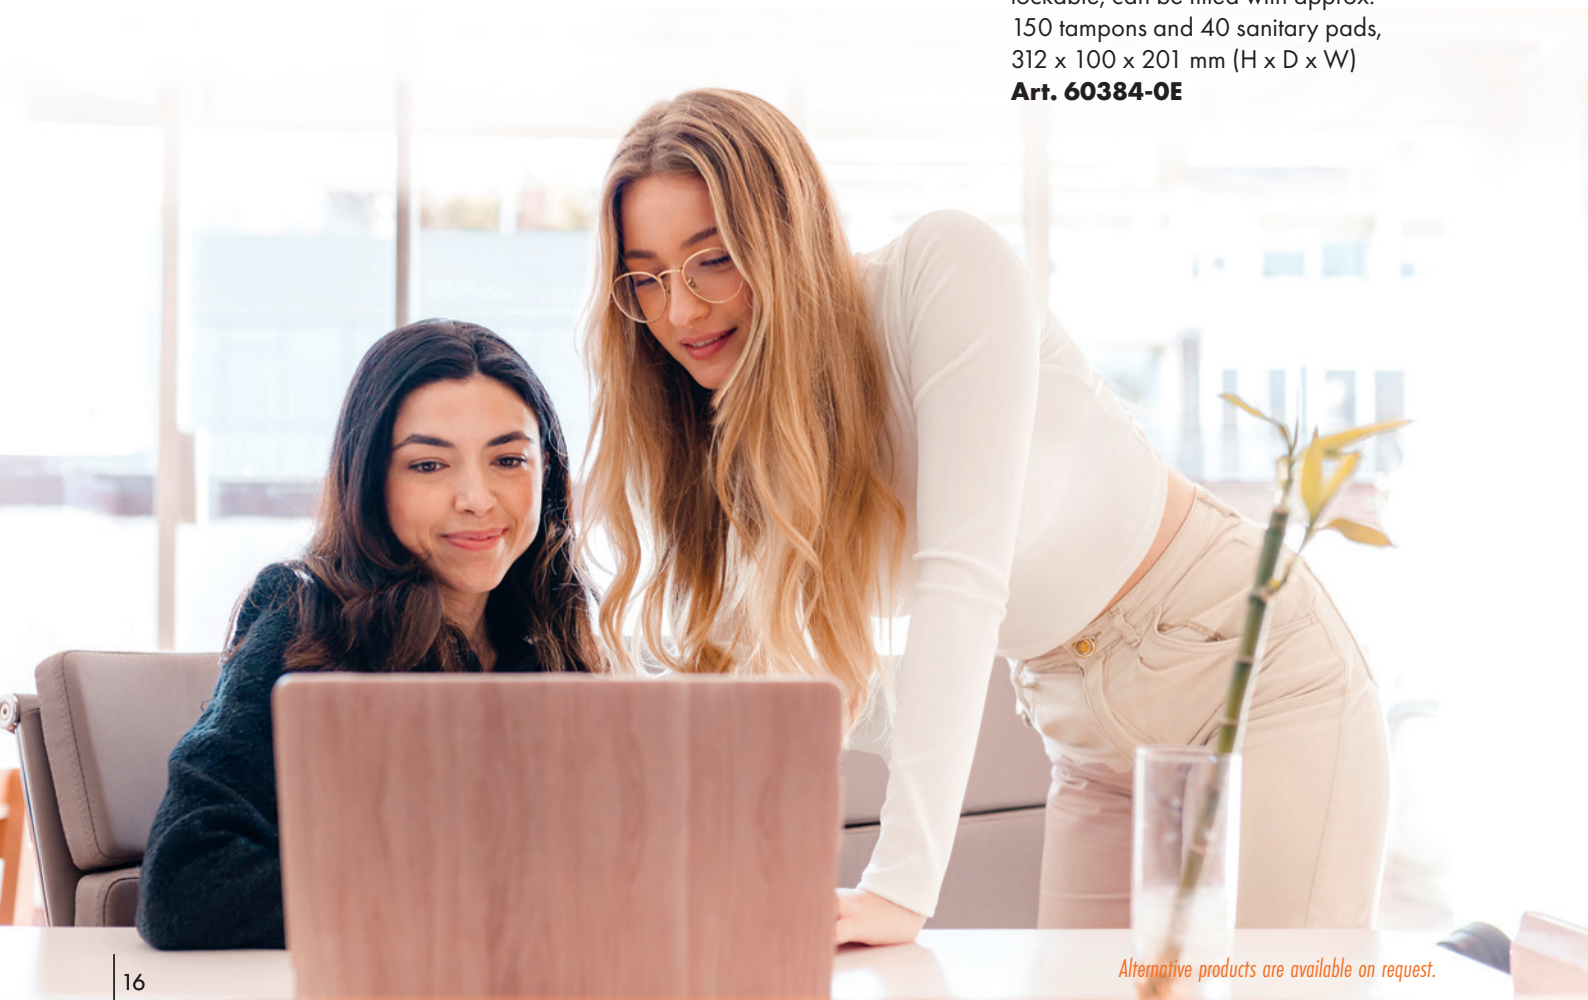

**Choose comfort and quality – for the well-being of everyone!**

#### **Tampon/sanitary pad dispenser**

Brushed stainless steel (**STEEL** series), lockable, can be filled with approx. 150 tampons and 40 sanitary pads, 312 x 100 x 201 mm (H x D x W)

**Art. 60384-0E**

## Tampons and Sanitary Pads

### – in different varieties

Choose from our selection of high-quality tampons and sanitary pads to refill the tampon/pad dispenser:

#### Tampons

Tampons have a slim shape with a smooth, rounded tip. Special grooves ensure even fluid absorption, while the individual wrapping is easy to open with a simple twist.

**Tampon Mini** – ideal for light-flow days,

PU of 320 (20 x 16) · **Art. 12820-00**

**Tampon Regular** – ideal for medium-flow days,

PU of 320 (20 x 16) · **Art. 12821-00**

#### Sanitary pads

The ultra-thin sanitary pads with wings and an extra-soft surface provide a pleasantly dry feeling and optimal wearing comfort – perfect even under tight-fitting clothing.

Moisture is absorbed quickly and locked in safely

**Sanitary pads Blue** – normal, 2 mm thin, breathable, odour control,

PU of 240 (12 x 20) · **Art. 12830-00**

The ultra pads made from bamboo fibers are soft, smooth, and comfortable. They ensure even fluid absorption along the surface. The absorbent cotton core provides higher antibacterial protection, while the leak-proof layer is made from bio-based sugarcane fibers.

**Sanitary pads Organic**, normal

PU of 160 (16 x 10) · **Art. 12840-00**

## Soft Bottle Dispenser

The bottles are inserted upside down into the dispenser, allowing the cream to automatically flow to the opening. This eliminates the need for any pump mechanism. With a light press of the dispenser lever, the desired amount of cream is dispensed precisely.

The large viewing window ensures easy identification of the product, including application area and formulation.

Included with the dispenser, you will receive stickers for clear labeling of the contents:

**skin protection**, **skin cleansing** or **skin care**.

Further variants available on request.

## Dispenser series **STEEL**

## High quality and robust

Our washroom dispensers in the **STEEL** series combine elegance with durability. The integrated windows make it easy to check the fill level. The dispensers impress with their special vandalism resistance, especially compared to ABS dispensers.
